

Ker Soon Kang

Full Stack Developer

4 years of full stack experience with hands-on troubleshooting,
systems support, and client-facing technical assistance

0416363452 | [Kang Ker Soon | Portfolio](#) | kskang033@gmail.com

Skills & Abilities

Languages: JavaScript, Typescript, HTML5, CSS3/SCSS, Ruby, PHP, C#, SQL, MQL, VB.net, Java, Python, C++

Technologies: React, React Router v7, Node.js, Ruby on Rails, Craft 5 CMS, Appwrite, Docker, UiPath, MySQL, JQuery, Elasticsearch, PostgreSQL, .NET, MacOS, GIT, DDEV, Unity, Agile Methodologies, Frontend libraries (Mantine, MUI, Tailwind, Bootstrap), MongoDB, Firebase(Firestore, RTDB), Microsoft 365(Outlook, Excel, Sharepoint), Azure, Jira, Vikunja, Networking fundamentals

Transferable:

- **Problem-Solving Skills:** Confident analytical and troubleshooting skills for managing and triaging problems/tickets using an array of ticketing systems such as **Jira and Vikunja**
- **Hardware & Networking Skills:** Experience in building and repairing computing hardware failures, rolling out new devices, as well as troubleshooting networking issues.
- **Collaboration and Communication:** Experience working in cross-functional teams, effectively communicating technical concepts to non-technical stakeholders and relocating specialized requests to the relevant subject matter experts.
- **People Skills:** Experience in handling dissatisfied clients in a calm and reassuring manner with the goal of solving their issues or tempering expectations to meet the bounds of our scope/limitations.
- **After Hours Support:** Experienced in providing support for technical problems and bug fixes after standard business hours.
- **Remote Work:** Experience in working remotely, connecting to remote resources via VPN.
- **Continuous Learning:** Commitment to staying updated with emerging technologies and industry trends.
- **Multilingual:** English, Bahasa Malaysia.

Work Experience

Good Dog Design
Full Stack Developer |
Jan 2021 - Sep 2024

Arthur J Gallagher & Co

- Developed a data scraping automation and website using **UiPath (Visual Basic), Ruby on Rails, PostgreSQL, HTML/HAML, CSS and UiPath**
- Contributed to the team to create a **Ruby on Rails** website that would display the data and forms to update existing entries.
- Frequently visited sites and provided technical and applications support to company brokers post product handover for many months after.
- Developed a proof of concept for a web app that handles the data transformation and quote binding from FormStack to CHU Insurance. Utilised the CHU third party **API, Ruby on Rails, HTML/HAML, CSS, PostgreSQL and Docker.**

Callan

- Solved bug and feature implementation tickets via **Jira**
- Collaborated in an **Agile** team environment, enhancing team productivity and project delivery.
- Developed an export system to format their financial data and export it into an excel sheet for forms and tables that weren't using the ag grid. Utilised **React, Javascript, Regex, HTML/HAML, CSS, TypeScript.**
- Implemented front end features using provided **Figma** designs.

Good Dog Design

- Developed "Meet the team" page for the Good Dog Design website, tabling and displaying each employee's profiles displayed on the page using **CRAFT 5 CMS, PHP, Docker and DDEV.**
- Collaborated with design team and translated **Figma** designs provided into front end implementations

BTR

- Developed SWMS forms for the labour worksite scheduler project using **HTML & Ruby on Rails**, implementing additional features to add and update signatures.
-

SolaFlo
Full Stack Developer |
June 2024 - Current

Solaflo

- Solved and efficiently triaged both bug and feature tickets with the use of **Vikunja**.
- Developed a greenfield **Ecommerce** website that had both a store and back office for internal company users using **React, React Router v7, Stripe and Node.js**
- Developed backend web api to fetch and manipulate pump/solar data received from both **Firebase(RTDB)** and **MongoDB(MQL)** to both the website and the mobile app.
- Designed and implemented the layout/style of the website using **Figma** and **Material UI(MUI)**.
- Designed and implemented the database for inventorying within **MongoDB**
- Worked with **AWS** and **MySQL(SQL)** databases to pull historical data for back end api.
- Developed pages for the back office to display live data for solar irradiance values and pumps using charts and graphs. Integrating data received from both **Firebase, MongoDB** with live data from the **MQTT** servers

B.E.E.R Labs
Full Stack Developer |
Dec 2024 - June 2024

B.E.E.R Labs

- Collaborated in creating a MVP(minimum viable product) of a real estate & rental management solution utilising **React/Javascript/Typescript** and **Appwrite**.
- Created controllers and hooks for several back-end features such as authentication, routing and password recovery, all done under an **Agile** approach.
- Created several pages and components for the front-end website for both desktop and mobile views based on the **Figma** designs provided, utilising **TailwindCss** and **Mantine**.

University of South Australia
Research Assistant |
Dec 2020 - Jan 2021

- Developed a **Unity** project using **C#** and **Elasticsearch** with the goal of placing first responders in a stressful situation and gathering their heart rate data.
- Collaborated with a 3d artist & voice actors to create the voiced character models used in the **Unity** simulation.

Education

University of South Australia
Bachelors of
Software Engineering
(Honours) | Feb 2017
- Dec 2020

- Worked in coordinated teams for projects.
- Communicating with stakeholders & coworkers.
- Learned & researched good code structure and documentation.
