Work Experience

Good Dog Design
Full Stack Developer |
Jan 2021 - Sep 2024

Worked with several clients while at Good Dog Design:

Callan

- Collaborated in an **Agile** team environment, enhancing team productivity and project delivery.
- Developed an export system to format their financial data and export it into an excel sheet for forms and tables that weren't using the ag grid. Utilised **React**, **Javascript**, **Regex**, **HTML/HAML**, **CSS**, **TypeScript**.
- Implemented front end features using provided **Figma** designs.

Arthur J Gallagher & Co

- Developed a data scraping automation and website using **UiPath (Visual Basic)**, **Ruby on Rails**, **PostgreSQL**, **HTML/HAML**, **CSS** and **UIPath**
- Contributed to the team to create a **Ruby on Rails** website that would display the data and forms to update existing entries.
- Developed a proof of concept for a web app that handles the data transformation and quote binding from FormStack to CHU Insurance. Utilised the CHU api, **Ruby on Rails**, **HTML/HAML**, **CSS**, **PostgreSQL** and **Docker**.

Good Dog Design

- Developed "Meet the team" page for the Good Dog Design website, tabling and displaying each employee's profiles displayed on the page using **CRAFT 5 CMS**, **PHP**, **Docker** and **DDEV**.
- Collaborated with design team and translated **Figma** designs provided into front end implementations

BTR

- Developed SWMS forms for the labour worksite scheduler project using **Ruby on Rails**, implementing additional features to add and update signatures.

University of South Australia
Research Assistant |
Dec 2020 - Jan 2021

- Developed a **Unity** project using **C#** and **Elasticsearch** with the goal of placing first responders in a stressful situation and gathering their heart rate data.
- Collaborated with a 3d artist & voice actors to create the voiced character models used in the **Unity** simulation.

Skills & Abilities

Languages: JavaScript, Typescript, HTML5, CSS3/SCSS, Ruby, PHP, C#, SQL, VB.net, Java, Python, C++

Technologies: React, Ruby on Rails, Craft CMS, Figma, Docker, UiPath, MySQL, Elasticsearch, PostgreSQL, .NET, Jira, MacOS, GIT, DDEV, Unity, Agile Methodologies

Transferable:

- **Problem-Solving Skills:** Confident analytical and troubleshooting skills for debugging and optimising code.
- **Collaboration and Communication:** Experience working in cross-functional teams and effectively communicating technical concepts to non-technical stakeholders.
- **Continuous Learning:** Commitment to staying updated with emerging technologies and industry trends.

Education

University of South Australia
Bachelors of
Software Engineering
(Honours) | Feb 2017
- Dec 2020

- Worked in coordinated teams for projects.
- Communicating with stakeholders & coworkers.
- Learned & researched good code structure and documentation.
